EDUCATION

GOVT. GANDHI MEMORIAL SCIENCE COLLEGE, J&K— Bachelor's Degree — Science Stream

MV INTERNATIONAL SCHOOL, J&K— 12th Grade — Science Stream

CERTIFICATIONS

- **Google Data Analytics Professional Certificate**— Google / Coursera
- **Microsoft AI/ML Engineering Certificate**— Microsoft
- **Building with Claude API**— Anthropic
- **Claude with Amazon Bedrock**— Anthropic
- **Claude with Google Cloud Vertex AI**— Anthropic

WORK EXPERIENCE

SND TECHNOLOGIES— Remote — Business Development Executive Intern — Jan 2026 – Feb 2026

- Automated KPI reporting by building Python data pipelines and Excel dashboards (Pivot Tables, XLOOKUP), eliminating ~30% of manual reporting effort and saving 10+ hours per week for the team.
- Designed and deployed SQL queries and Tableau dashboards surfacing actionable sales trends — directly informing weekly strategic decisions for cross-functional stakeholders.
- Contributed to API integrations and internal workflow automation scripts, reducing repetitive operational tasks and improving overall team turnaround time.

VIRTUAL EXPERIENCE (FORAGE SIMULATIONS)

DELOITTE AUSTRALIA— Data Analytics & Cyber Simulation — 2026

- Performed end-to-end data cleaning, anomaly detection, and structured reporting in a Big-4 cybersecurity consulting context — mirroring real analyst deliverables.

JPMORGAN CHASE— Investment Banking & Software Engineering Simulation — 2026

- Completed financial data analysis and software engineering tasks replicating live investment-banking workflows, including data modeling and stakeholder reporting.

PROJECTS

AI DATA INSIGHTS ENGINE— Personal Project — 2025 – 2026

- Built LLM-powered analytics tool auto-ingesting CSV/Excel datasets to generate business summaries, trend charts, and anomaly alerts — reducing manual analysis time by 60%.
- Integrated Claude API for natural-language data querying, enabling non-technical stakeholders to extract insights in plain English without writing SQL.

KPI PERFORMANCE DASHBOARD— Personal Project — 2025

- Engineered a full BI pipeline pulling live SQL data into Tableau with dynamic filters — reduced ad-hoc reporting requests by ~40% and cut report generation time significantly.

AETHEX — AI-POWERED SAAS PLATFORM— Startup Project — 2025 – 2026

- Designed role-based analytics dashboards and REST API integrations for a full-stack AI medical platform — hands-on experience with real product data pipelines and user-facing reporting.
- Building investor pitch materials, seed round deck (INR 2 Crore ask), and Lovable-built web presence targeting Indian doctors and medical students.

ADDITIONAL

Technical Skills: SQL, Python (Pandas, NumPy, Scikit-learn), R, Excel (Pivot Tables, XLOOKUP, Power Query), Tableau, Power BI, Streamlit, Claude API, Amazon Bedrock, Vertex AI, Azure AI, FastAPI, React, Docker, Git/GitHub, AWS, Google Cloud, PostgreSQL, MySQL, REST APIs, RAG Pipelines, Prompt Engineering

Languages: English (Native), Hindi (Native)

Availability: Immediate — Remote or On-Site | Creative Tools: Adobe After Effects
